Qualifications for Teaching ACMA 470

Description

ACMA 470 is a specialised upper division course in actuarial science covering ratemaking, individual risk rating, loss reserving, and risk classification for property and casualty insurance products. This course also covers part of the syllabus for Exam 5 of Casualty Actuarial Society. A project and/or a presentation integrating the topics covered might be assigned by the instructor. The audience consists of third/fourth year and probably graduate actuarial students with a strong quantitative background.

Qualifications

Education:

- **Required:**
  - A degree in Actuarial Science or a closely related field.
  - Associate or Fellow of a professional actuarial association.

Teaching Experience:

- **Preferred:**
  - Prior teaching experience of actuarial courses with good evaluations.
  - Experience teaching property and casualty courses.

Practical Experience:

- **Required:**
  - At least 2 years of prior experience working with property and casualty insurance products.

Communication:

- **Required:**
  - Excellent oral and written communication skills
