

# Suitable Areas for Children's Camp (Westborough, MA)

Project Goal:

Locating the potential areas for a children's camp to be built.

Parameters:

- Away from urban areas
- Near water
- Larger than one (1) hectare for main buildings

Result:

Nine (9) suitable areas

Suitable Areas for Children's Camps in Westborough, MA

Created by Bryan Tse

## **Project Summary**

The goal of this map is to locate the possible locations for a children's camp by having it away from urban areas and close to a body of water for water activities.

## **Criteria**

### **Distance from developed areas (600m)**

We want the children to feel removed from the urban setting but not too far for parents/guardians to drive there.

### **Distance to water (500m)**

Having some sort of body of water allows more fun, even if the water is a couple minutes away on foot.

### **Undeveloped land**

We don't want to use developed land as those are used for other purposes

### **Land area (1 Hectare)**

While this depends on the type of activities the camp offers, 1 hectare is enough for the lodgings and buildings themselves. The rest of the land (ie. Wilderness) is not calculated as it depends on the number/type of activities.

## **Results**

There are 9 suitable areas for a children's camp.
