

Department of Molecular Biology & Biochemistry

MBB 496-6

**Independent Study Semester
Joint Honours MBB-BUS and CMPT-MBB**

Directed reading and part-time scientific research in an area of molecular biology or biochemistry. This course is intended only for those students taking a joint MBB/BUS or MBB/CS honors degree. Prerequisite: 75 credit hours and upper division standing in an MBB joint honors program, and MBB 308. Students who take MBB 496 are not allowed to take MBB 481, 482 or 483 with the same faculty supervisor.

- Confirm enrolment in honors program.
- (Week 4 of preceding semester) Find a faculty member (full, associate, or adjunct member of the MBB department) willing to supervise you in this course.
- The faculty member should then help the student prepare a written proposal (one to two pages) stating the nature of the research readings and project.
- The course will include the preparation of a written report on the results of the project and may, at the discretion of the supervisor, include an oral presentation of the results.

The written proposal, advising transcript, along with this registration form - completely filled out - should be brought to the MBB office by the last day of exams for the preceding semester.
