

## Research Expertise Engine Manual – For Researchers

### UPDATE YOUR SETTINGS

Once logged into Research Expertise Engine (REE), click on ‘Settings’ on the top right-hand side of the page to update information in your profile.

Faculty of Applied Sciences (133) ▾

School of Computing Science (64) ▾

By default, your primary name is displayed. If you wish to change this, please update your preferred name.

\* Preferred First Name:  5 / 255 CHARACTERS

\* Preferred Last Name:  6 / 255 CHARACTERS

If you are currently accepting graduate students, you can activate this section to display in your profile. Activating this section also allows you to add in additional requirements notes to show on your profile. While REE is only currently view-able to those with an SFU computing ID, it will be available for anyone to see in the near future – including prospective graduate students.

Accepting Graduate Students:

Recruitment Notes:

Best efforts were made to populate research keywords and SFU/personal webpages. If this information is inaccurate, please update it to allow for users to see this current information in your profile. If you wish to add additional information regarding your research, toggle the 'show research description' field to active and add in relevant information below.

\* Research Keywords:

Please separate your keywords by a comma. 91 / 1000 CHARACTERS

SFU or Personal Webpage:

53 / 255 CHARACTERS

Show Research Description:

Research Description: **B I U**

My research is best described here: [my homepage](#)

123 / 5000 HTML CHARACTERS

You are also able to add in your preferred email address, preferred pronouns, primary campus and languages to your profile. These optional fields will make it easier for someone to connect with you and your research.
