

# Contents

Preface . . . . .	vii
List of Figures . . . . .	xiv
List of Tables . . . . .	xviii
<b>1 Tensor Analysis on Differentiable Manifolds . . . . .</b>	<b>1</b>
1.1 Differentiable Manifolds . . . . .	1
1.2 Tensor Fields over Differentiable Manifolds . . . . .	18
1.3 Riemannian and Pseudo-Riemannian Manifolds . . . . .	42
1.4 Extrinsic Curvature . . . . .	89
<b>2 The Pseudo-Riemannian Space-Time Manifold <math>M_4</math> . . . . .</b>	<b>105</b>
2.1 Review of the Special Theory of Relativity . . . . .	105
2.2 Curved Space-Time and Gravitation . . . . .	138
2.3 General Properties of $T_{ij}$ . . . . .	177
2.4 Solution Strategies, Classification, and Initial-Value Problems . . . . .	200
2.5 Fluids, Deformable Solids, and Electromagnetic Fields . . . . .	216
<b>3 Spherically Symmetric Space-Time Domains . . . . .</b>	<b>237</b>
3.1 Schwarzschild Solution . . . . .	237
3.2 Spherically Symmetric Static Interior Solutions . . . . .	256
3.3 Non-static, Spherically Symmetric Solutions . . . . .	269
<b>4 Static and Stationary Space-Time Domains . . . . .</b>	<b>288</b>
4.1 Static Axially Symmetric Space-Time Domains . . . . .	288
4.2 The General Static Field Equations . . . . .	302
4.3 Axially Symmetric Stationary Space-Time Domains . . . . .	330
4.4 The General Stationary Field Equations . . . . .	346
<b>5 Black Holes . . . . .</b>	<b>364</b>
5.1 Spherically Symmetric Black Holes . . . . .	364
5.2 Kerr Black Holes . . . . .	399
5.3 Exotic Black Holes . . . . .	418
<b>6 Cosmology . . . . .</b>	<b>434</b>
6.1 Big-Bang Models . . . . .	434
6.2 Scalar Fields in Cosmology . . . . .	456

6.3 Five-dimensional Cosmological Models . . . . . 471

**7 Algebraic Classification of Field Equations . . . . . 481**

7.1 The Petrov Classification of the Curvature Tensor . . . . . 481

7.2 Newman-Penrose Equations . . . . . 524

**8 The Coupled Einstein-Maxwell-Klein-Gordon Equations . . . 560**

8.1 The General E-M-K-G Field Equations . . . . . 560

8.2 Static Space-time Domains and the E-M-K-G Equations . . . . . 566

8.3 Spherical Symmetry and a Non-linear Eigenvalue Problem for a  
Theoretical Fine-Structure Constant . . . . . 575

**Appendix-1 Variational Derivation of Differential Equations . . 593**

**Appendix-2 Partial Differential Equations . . . . . 609**

**Appendix-3 Canonical Forms of Matrices . . . . . 628**

**Appendix-4 Conformally Flat Space-Times and  
“the Fifth Force” . . . . . 639**

**Appendix-5 Linearized Theory and Gravitational Waves . . . . 647**

**Appendix-6 Exotic Solutions: Wormholes, Warp-Drives, and  
Time Machines . . . . . 654**

**Appendix-7 Gravitational Instantons . . . . . 667**

**Appendix-8 Computational Symbolic Algebra Calculations . . 672**

**References . . . . . 680**

**Index of Symbols . . . . . 690**

**Index . . . . . 698**
