

List of Tables

1.1	Number of independent components of the Riemann tensor	60
2.1	Non-relativistic and corresponding relativistic quantities	127
4.1	Comparison between Newtonian gravity and Einstein static gravity outside matter.	304
7.1	Complex Segre characteristics and principal null directions for various Petrov types.	517
8.1	Physical quantities associated with the first five eigenfunctions of $U_{(j)}(x)$	592
