

EVALUATION OF 419 GROUP PRESENTATIONS

Possible Elements:

- Picking a Sector:
 - A new sector with all new companies
 - A sector previously done but a long time ago
 - A sector previously done but with one or more new companies
 - A sector previously done with all the same companies
- Doing the slides (explained during office hours)
 - Having found the relevant risk management and derivative usage information from the recent 10-K and/or annual report including financial statements
 - This includes having the most relevant information from the MD&A
 - Identifying relevant information about the sector
- Execution
 - Did the presentation start on time?
 - Was the digital copy delivered to me prior to the presentation?
 - Was a hard copy provided at the start of the presentation?
 - Did the presentation use the proper format (each person doing their component)?

Example of 18/20 ==> A+ ==> New sector, all new companies, completion without issues with execution and slides

Example of 17/20 ==> A ==> same as 18/20 but issues with execution or slides
==> A sector previously done with one new company and completion without issues of execution and slides

Example of 16.5/20 ==> A/A- ==> Same as above using a sector previously done with all same companies.

MAXIMUM POSSIBLE IS 20/20 -> this is very difficult and requires a detailed writeup (maximum 2 points -> possibly less if the writeup mostly reproduced what is in the slides)
