

In the soybean crush spread:

Soybean prices are in cents/quarter cents per bushel (5000 bushels per contract) with the last digit in 1/8's, so a quote of

736'4 translates into \$7.3650 per bushel

764'6 translates into \$7.6475 per bushel

Soybean meal prices are \$/cents per ton (100 short tons per contract) with the last digit in 10 cent units, so a quote of

217'3 translates into \$217.30 per ton

229'8 translates into \$229.80 per ton

Soybean oil prices are in cents/lb (60,000 lbs per contract) with the last digit in 1/100 of a cent, so a quote of

30'43 translates into 30.43 cents per lb or \$0.3043 per lb

31'94 translates into 31.94 cents per lb or \$0.3194 per lb.
